"How do I improve my math skills?" is an incredibly easy question to answer. The answer, of course, is practice. It is almost impossible to improve your math skills without doing lots of exercises. Let's face it - repetition is the boring but unavoidable path to mastery of math. Kid needs practice (and lots of it) - they don't learn math by osmosis, but by burning up pencils and paper. Our math exercises follow a simple uncluttered format and aim to do wonders for kids. They also serve well as teaching tools for classroom teachers, parents and homeschoolers. Classroom teachers use our exercises to assess students' mastery of basic math facts, to give students extra math practice, to teach new math strategies, and to save precious planning time. Parents use our exercises to give their kids extra math practice to enhance their math education. Homeschoolers use our exercises for homeschool education to develop and strengthen math skills in their kids. There are 1000+ questions (in horizontal

format) included, covering one step, two step and multi step equations. A Perfect book to help you prepare for the ALEKS Math Test! Tyler Wallace continues to offer an enlightened approach grounded in the fundamentals of classroom experience in Beginning and Intermediate Algebra. The text reflects the compassion and insight of its experienced author with features developed to address the specific needs of developmental level students. Throughout the text, the author communicates to students the very points their instructors are likely to make during lecture, and this helps to reinforce the concepts and provide instruction that leads students to mastery and success. The exercises, along with the number of practice problems and group activities available, permit instructors to choose from a wealth of problems, allowing ample opportunity for students to practice what they learn in lecture to hone their skills. In this way, the book perfectly complements any learning platform, whether traditional lecture or distance-learning; its instruction is so reflective of what comes from lecture, that students will feel as comfortable outside of class as they do inside class with their instructor.
