The book adopts a reflexive and relational stance without compromising the rigour and quality of research to allow the reader to appreciate the shared and distinct immigration and (re)settlement experiences of refugees and their communities

in all of their complexity. This book will be a valuable resource to, and a source of reflection for, researchers, educators, students, service providers, and policymakers who are committed to envisioning Canada as a country where all newcomers feel rooted and safe. In twenty-five years, 80% of the world population will live in Asia and Africa. What changes, culturally I particular, should be expected in this century? This is the vast and fascinating question Jean-Louis Roy tries to answer with the help of correspondents from Africa, Asia, the Americas and Europe. The author argues that shifting wealth from the West to Asia, Latin America and Africa causes the reconfiguration of the economic map. This tilting also transforms the global cultural space. The dominant cultural position occupied by the Atlantic area will not disappear overnight. However, it is important to note that emerging countries are working earnestly, well served by the tools of the digital age. For example, China is already the world leader in the art market, and Nigeria, the second in international film production after India. Diversity emerges from all sides. Welcome to the twenty-first century! ADDA 247 is launching a complete and comprehensive eBook on "UPSC CDS (IMA INA, AFA) and CDS OTA". The eeBook is updated as per the latest examination pattern and is suitable for UPSC CDS (IMA, INA, AFA) and UPSC CDS OTA (Officer Training Academy). agricultural produce, integrating empirical experience from India and other selected developing countries. The scenario of marketing for agricultural products has been undergoing rapid changes with the rise of organised retailing (the Indian term for 'supermarkets'), a process that is likely to accelerate in years to come, with India being on the threshold of a supermarket revolution. In fact, India is referred to as the 'final frontier' in the development of supermarkets. The growth of supermarkets in India is faster than that in China, which is also witnessing an exponential growth as part of the "third wave" of supermarket diffusion. The book investigates the links between organised retailing and farmers and farming in India. Apart from raising issues of equity, inclusion and problems in policy framework, it also discusses policy interventions that are essential in order to make the development of organised retailing more inclusive and beneficial to the farming community and agricultural sector. The book further serves as a guide for policy makers, helping them to select the right kind of interventions to balance growth with equity as market forces penetrate deeper into the agricultural marketing space. The Ganges is one of the most complex yet fascinating river systems in the world. The basin is characterized by a high degree of heterogeneity from climatic, hydrological, geomorphological, cultural, environmental and socio-economic perspectives. More than 500 million people are directly or indirectly dependent upon the Ganges River Basin, which spans China, Nepal, India and Bangladesh. While there are many books covering one aspect of the Ganges, ranging from hydrology to cultural significance, this book is unique in presenting a comprehensive inter-disciplinary overview of the key issues and challenges facing the region. Contributors from the three main riparian nations assess the status and trends of water resources, including the Himalayas, groundwater, pollution, floods, drought and climate change. They describe livelihood systems in the basin, and the social, economic, geopolitical and institutional constraints, including transboundary disputes, to achieving productive, sustainable and equitable water access. Management of the main water-use sectors and their inter-linkages are reviewed, as well as the sustainability and trade-

offs in conservation of natural systems and resource development such as for hydropower or agriculture. Arihant has come up with a revised edition of a compendium of over 14000 questions which will significantly improve the knowledge of aspiring students by providing them with ready and reliable practice material for General Studies. The book has been designed for the aspirants preparing for IAS (CSAT), State PCS, CDS, NDA and other competitive examinations. The revised edition of this question bank focuses on Indian History & Culture, India & World Geography (Env & Eco), Indian Polity, Indian Economy, General Science, Science & Technology, General Knowledge and Current Affairs. The book contains the collection of over 14000 questions covering General Studies. The History section covers ancient, medieval and modern history whereas the Geography section covers world geography, Indian geography and environment & ecology. The General Science section covers Physics, Chemistry, Biology and Science & Technology. The questions covered in the book contain answers side by side to help aspirants evaluate themselves after attempting a certain number of questions. Also the questions asked in recent years' General Studies examinations have been provided in the book with authentic and detailed solutions to help aspirants get an insight into the recent examination pattern and the types of questions asked therein. Each chapter in the book contains a variety of questions according to the latest pattern Assertion-Reason, Matching, Multi-Statements, Arrangements, Pairing, etc. Also more than 500 questions based on Current Affairs have been provided in the book to give an additional advantage to the aspirants. As the book contains ample number of objective questions which have been designed for students of various competitive examinations, it for sure will act as the best preparation material for general studies for UPSC (CSAT), State PCS, CDS, NDA, etc. An adaptation of Shakespeare's plays as a basis of critical exploration of identity formation in India. Even while a conscious dismantling of colonization was happening since the 19th century, the Indian literati, intellectuals, scholars and dramaturges were engaged in deconstructing the ultimate icon of colonial presence—Shakespeare. This book delves into what constitutes

Indianness in the postcolonial context by looking into the text and sub-text of the Bard of Avon's plays adapted in visual culture, translation, stage performance and cinema. The book is an important intervention in the ongoing explorations in social and cultural history, as it explores how Shakespeare has impacted the emergence of regional identities around questions of language and linguistic empowerment in various ways. It reveals an extraordinary negotiation of colonial and postcolonial identity issues—be it in language, in social and cultural practices or in art forms. When risks are quantified and the potential impacts of hazards are anticipated, governments, communities, and individuals are able to make more informed decisions. This publication highlights some of the influential efforts—by

technical specialists, institutions, and governments around the world—to create and communicate risk information quickly and at low cost, to improve the quality and transparency of risk information, and to enable more local engagement in the production of authoritative risk information than ever before. Case studies spanning 40 countries and contributed by more than 50 institutions showcase emerging best practices, demonstrate how risk assessments are being used to inform disaster risk management and broader development, and highlight lessons learned through these efforts. " This book constitutes the thoroughly refereed proceedings of the 6th National Conference of Social Media Processing, SMP 2017, held in Beijing, China, in September 2017. The 28 revised full papers presented were carefully reviewed and selected from 140 submissions. The papers address issues such as: knowledge discovery for data; natural language processing; text mining and sentiment analysis; social network analysis and social computing. Reviewing peace and reconciliation, secular pilgrimages, and international perspectives on sacred journeys, this book offers the reader an opportunity to encounter multiple voices and viewpoints on one of the most ancient practices of humankind. With an estimated third of all international travellers now undertaking journeys anticipating an aspect of transformation (the hallmark of pilgrimage), this book includes both spiritual and non-spiritual voyages, such as journeys of self-therapy, mindfulness and personal growth. An innovative and engaging addition to the pilgrimage literature, this book provides an important resource for researchers of religious tourism and related subjects. With nearly a quarter of the world's population, members of at least five major language families plus several putative language

isolates, South Asia is a fascinating arena for linguistic investigations, whether comparative-historical linguistics, studies of language contact and multilingualism, or general linguistic theory. This volume provides a state-of-the-art survey of linguistic research on the languages of South Asia, with contributions by well-known experts. Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research. In addition to covering the languages, their histories, and their genetic classification, as well as phonetics/phonology, morphology, syntax, and sociolinguistics, the volume provides special coverage of contact and convergence, indigenous South Asian grammatical traditions, applications of modern technology to South Asian languages, and South Asian writing systems. An appendix offers a classified listing of major sources and resources, both digital/online and printed. The book describes the emergence of big data technologies and the role of Spark in the entire big data stack. It compares Spark and Hadoop and identifies the shortcomings of Hadoop that have been overcome by Spark. The book mainly focuses on the in-depth architecture of Spark and our understanding of Spark RDDs and how RDD complements big data's immutable nature, and solves it with lazy evaluation, cacheable and type inference. It also addresses advanced topics in Spark, starting with the basics of Scala and the core Spark framework, and exploring Spark data frames, machine learning using Mllib, graph analytics using Graph X and real-time processing with Apache Kafka, AWS Kinesis, and Azure Event Hub. It then goes on to investigate Spark using PySpark and R. Focusing on the current big data stack, the book examines the interaction with current big data tools, with Spark being the core processing layer for all types of data. The book is intended for data engineers and scientists working on massive datasets and big data technologies in the cloud. In addition to industry professionals, it is helpful for aspiring data processing professionals and students working in big data processing and cloud computing environments.

Combining the latest research and most current coverage available into a succinct nine chapters, FUNDAMENTALS OF INFORMATION SYSTEMS, 8E equips students with a solid understanding of the core principles of IS

and how it is practiced. The streamlined 560-page eighth edition features a wealth of new examples, figures, references, and cases as it covers the latest developments from the field--and highlights their impact on the rapidly changing role of today's IS professional. In addition to a stronger career emphasis, the text includes expanded coverage of mobile solutions, energy and environmental concerns, the increased use of cloud computing across the globe, and two cases per chapter. Learning firsthand how information systems can increase profits and reduce costs, students explore new information on e-commerce and enterprise systems, artificial intelligence, virtual reality, green computing, and other issues reshaping the industry. The text introduces the challenges and risks of computer crimes, hacking, and cyberterrorism. It also presents some of the most current research on virtual communities, global IS work solutions, and social networking. No matter where students' career paths may lead, **FUNDAMENTALS OF INFORMATION SYSTEMS, 8E** and its resources can help them maximize their success as employees, decision makers, and business leaders. A Call to Follow Jesus When He Challenges Our Traditions There are many challenges to adequately representing Jesus to the majority world, and often Western Christian traditions create unnecessary hindrances to people accepting His truth. This book grew out of many interviews with Indian Jesus-followers—both Christians and Yesu bhaktas—who identified painful stumbling blocks to receiving and sharing the gospel. While Hindus often have a high view of Jesus, they struggle with the conventions, practices, and labels around "church."

Christian Barriers to Jesus uniquely challenges readers to examine nine barrier-producing Christian traditions, exploring:

- The assumptions Christians may hold about the value, origin, or necessity of their customs
- The concerns Hindus commonly raise about traditions that confuse, offend, or alienate them
- Teachings from Jesus in Scripture that often question the same ideas or practices

Pennington suggests that by not asking deep enough questions about what is essential for following Jesus

and what is a non-essential human invention, the church is unnecessarily alienating millions of people from Him. As a body, it is time to honestly address these concerns, developing new patterns of discipleship that reveal Jesus's heart for breaking down barriers instead of creating them. The analysis presented in this book will empower readers to critically examine their personally cherished traditions and the purity of the gospel they present, with insights that are relevant in all contexts.
