Let our study guides guide you along the path to the professional career of your dreams This is a time line that follows the Annals of the World time line by James Ussher. From the award-winning and bestselling author of Cod comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured – all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a large part of the Earth’s rock fairly close to the surface. From pre-history until just a century ago – when the mysteries of salt were revealed by modern chemistry and geology – no one knew that salt was virtually everywhere. Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry. Canada, Kurlansky tells us, is the world’s sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans’ insatiable demand. As he did in his highly acclaimed Cod, Mark Kurlansky once again illuminates the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before. Everything You Need To Ace World History In One Big Fat Notebook kicks off with the Paleolithic Era and transports the reader to ancient civilisations - from Africa and beyond; the middle ages

There are five books in all, and each is the only one book you need for each main subject taught in the first years of high school: Maths, Science, English, and World History. Inside the reader will find every subject's key concepts, easily digested and summarised: Critical ideas highlighted in marker colours. Definitions explained. Doodles that illuminate tricky concepts. Mnemonics for a memorable shortcut. And quizzes to recap it all.
