Provides information for students wishing to narrow their choice of course before turning to prospectuses - saving them precious time when they need it most. Grouped by study field, this volume is divided into subject chapters with courses arranged alphabetically by title and institution. As teachers we often tend to expect other countries to teach chemistry in much the same way as we do, but educational systems differ widely. At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over the world: Teaching Chemistry around the World. 25 countries have participated in the project. The resulting country studies are presented in this book. This book may be seen as a contribution to make the structure of chemistry teaching in numerous countries more transparent and to facilitate communication between these countries. Especially in the case of the school subject chemistry, which is very unpopular on the one hand and occupies an exceptional position on the other hand – due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving – we have to learn from each others' educational systems. This book is suitable for students of all abilities and covers the knowledge and skills students will need as they progress through the course. The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time.

Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do. Written to cover the AQA GCSE Mathematics A modular specification (Unit 3, Foundation), our student book targets the skills and knowledge required for the exam. Functional mathematics is integrated throughout providing an emphasis on applying mathematics in a real-life context. This book provides a practical illustration of the skills, knowledge and understanding required to teach in the secondary classroom. As well as discussing concepts and ideas, the book gives a critical examination of some of the key issues, and will encourage the reader to engage with the ideas and consider their views and beliefs. It is an invaluable resource for those who are learning to teach or for those teachers who wish to reflect on their teaching practice. First Published in 2012. This book is a guide to introducing the craft of playwriting into the secondary English curriculum at key stage 3, using the TEEP (Teacher Effectiveness Enhancement Programme) framework. The authors also provide a particular focus on applying this versatile scheme of work to other areas of the curriculum, including Citizenship and PSHE. Playwriting Across the Curriculum also contains schemes of work for: pupils with special educational needs (SEN); pupils with English as an additional language (EAL); adaptation to Adult Literacy Core Curriculum. Its coverage of specific plays as part of the scheme ensures that students will engage with contemporary writing in their learning. This is an essential resource for anyone wanting to teach playwriting at secondary school level. Intending to help students revise the key topics they need to brush up on, this work includes "test yourself" diagnostic questions, worked examples, practice questions and summaries on important topics, and practice examination papers. The ICT Teacher's Handbook is an indispensable guide for all teachers responsible for the teaching and management of ICT in the secondary school, both as a comprehensive introduction for students learning to teach ICT and as a source of ongoing support for busy practising teachers. Illustrated throughout with case studies, key further reading and guidance on where to find and how to choose the best software and resources, the book also features a guide to

specifications, software for whole school support and a useful glossary of key terms.
